SUMMARY

I am a highly motivated Computer Science Engineering undergraduate with a pique interest of bridging theoretical computer science with real-world applications. I love to gain experience in rapid prototyping, hardware integration, and developing machine learning solutions. Currently, strengthening the ability to communicate technical vision and looking to apply strong algorithmic problem-solving skills to innovative tech initiatives.

EDUCATION

- **National Institute of Technology, Manipur** Manipur, India
Bachelor of Technology - Computer Science and Engineering; CGPA: 9.23 July 2024 - May 2028
- **Millinium Institue of Science** Manipur, India
Higher Secondary Examination - XII; Percentage: 87.6 July 2022 - July 2024
- **St. George High School** Manipur, India
High School Leaving Certificate Examination - X; Percentage: 89.5 February 2014 - July 2022

PROJECTS

- **High Performance Game Engine , based on Data Oriented Design** Ongoing
Personal Project - Engine Developement
 - Developing a complete game engine using Data oriented design principle baed ECS game engine design with LUA as scripting language , involving robust input handeling form multiple types of input devices , cache friendly data oriented arrangement of entities in the game.
 - Using SDL3(Simple Direct Media Layer 3) multimedia low level API
 - Data oriented design based ECS design
 - Supports Input handling form various devices(e.g Keyboard and Mouse , PS4 Joystick , Phone and tablet touch screen)
 - Audio output , 60 fps(default) (but can reach 120 fps)
 - **Technology Stack:** SDL3, SDL Image, C++, Vulkan

SKILLS

Languages:

C, C++, Python

Soft Skills:

Team Leadership, Communication, Problem-solving, Research Skills
